Journal of Research in Science Teaching

Volume 28, 1991

CONTENTS

Volume 28, Issue 1, January 1991

- Editorial: *Ronald Good* 1
- Teacher Awareness of Student Alternate Conceptions about Rotational Motion and Gravity: *Terrance Berg and Wytze Brouwer* 3
- Correlates of Formal Operational Reasoning: A Neo-Piagetian Analysis: *Mansoor Niaz* 19
- Effects of the Learning Cycle upon Student and Classroom Teacher Performance: *Edmund A. Marek and Suzanne B. Methven* 41
- Secondary Science Teachers' Attitudes toward and Beliefs about Science Reading and Science Textbooks: *Larry D. Yore* 55
- Model Building and a Definition of Science: *Steven W. Gilbert* 73
- Twelfth-Grade Biology Pupils' Opinions on Interventions of Man in Nature: Agreement, Indifference and Ambivalence: *Amos Dreyfus and Zvi Roth* 81
- Enhancing Learning Using Questions Adjunct to Science Charts: *William Holliday and Garth Benson* 97

Volume 28, Issue 2, February 1991

- Editorial: Research on Science-Mathematics Connections: *Ronald Good* 109
- The Inquiry Level of Junior High Activities: Implications to Science Teaching: *Edward L. Pizzini, Daniel P. Shepardson, and Sandra K. Abell* 111
- Effect of Written Text on Usage of Newton's Third Law: *Rosemary K. Boyle and David P. Maloney* 123
- Cooperative Learning and Group Educational Modules: Effects on Cognitive Achievement of High School Biology Students: *Scott B. Watson* 141
- The Determinants of Grades Three to Eight Students' Intentions to Engage in Laboratory and Nonlaboratory Science Learning Behavior: *Brian D. Ray* 147
- The Importance of Reflection in Improving Science Teaching and Learning: *John R. Baird, Peter J. Fensham, Richard F. Gunstone, and Richard T. White* 163

- Reliability and Concurrent Validity of a Measure of Critical Thinking Skills in Biology: *Mary Anne McMurray, Bruce Thompson, and Paul Beisenherz* 183
- The Relationship Between Affect and Achievement in Science: *Leonie J. Rennie and Keith F. Punch* 193

Volume 28, Issue 3, March 1991

- Guest Editorial: Mantras, False Dichotomies, and Science Education Research: *James H. Wandersee* 211
- The Effect of Laboratory and Lecture Teaching Methods on Cognitive Achievement in Integrated Science: *Olagunju Odubunmi and T.A. Balogun* 213
- Effects of Novelty-Reducing Preparation on Exploratory Behavior and Cognitive Learning in a Science Museum Setting: *Carole A. Kubota and Roger G. Olstad* 225
- Science Teacher Beliefs and Their Influence on Curriculum Implementation: Two Case Studies: *Linda L. Cronin-Jones* 235
- The Roots of Gender Inequity in Technical Areas: *James Reed Campbell* 251
- Formal Operational Reasoning Modes: Predictors of Critical Thinking Abilities and Grades Assigned by Teachers in Science and Mathematics for Students in Grades Nine Through Twelve: *Betty L. Bitner* 265
- The Effect of Instruction on Socio-Cultural Beliefs Hindering the Learning of Science: *Olugbemiro J. Jegede and Peter A.O. Okebukola* 275
- Book Review
- A Review of *Regions of the Mind: Brain Research and the Quest for Scientific Certainty*: *Victor L. Willson* 287

Volume 28, Issue 4, April 1991

- Editorial: Some Guidelines for Review: *Ron Good* 291
- Conceptual Change Strategies and Cooperative Group Work in Chemistry: *Patricia A. Basili and Julie P. Sanford* 293
- Using Analogy to Overcome Misconceptions About Conservation of Matter: *Ruth Stavy* 305
- Achievements and Attitudinal Patterns of Boys and Girls in Science: *Tamar Levin, Naama Sabar, and Zipora Libman* 315
- A Case Study of Two Exemplary Biology Teachers: *David F. Treagust* 329
- A Procedure for Determining the Level of Abstraction of Science Reading Material: *Myra K. Vachon and Richard E. Haney* 343

- Are High School Chemistry Textbooks Gender Fair?: *Judith A. Bazler and Doris A. Simonis* 353
- Children's Views Concerning Phase Changes: *Varda Bar and Anthony S. Travis* 363
- Comments and Criticism
- Comment on "Identification of Student Misconceptions in Genetics Problem Solving via Computer Program": *Mike U. Smith* 383
- Response to Dr. Smith's Comments and Criticisms Concerning "Identification of Student Misconceptions in Genetics Problem Solving via Computer Program": *Mark Browning and James D. Lehman* 385

Volume 28, Issue 5, May 1991

- Editorial: *Ronald Good* 387
- Relation of Field Independence and Test-Item Format to Student Performance on Written Piagetian Tests: *F. López-Rupérez, C. Palacios, and J. Sanchez* 389
- Effects of Discovery and Expository Instructional Methods on the Attitude of Students to Biology: *Gabriel Adeniyi Ajewole* 401
- Potential Interaction and Potential Investigation of Science Center Exhibits and Visitors' Interest: *Laurier Busque* 411
- Process Skills Acquisition, Cognitive Growth, and Attitude Change of Ninth Grade Students in a Scientific Literacy Course: *Dale R. Baker and Michael Piburn* 423
- Elementary School Teachers' Beliefs About and Perceptions of Elementary School Science, Science Reading, Science Textbooks, and Supportive Instructional Factors: *James A. Shymansky, Larry D. Yore, and Ronald Good* 437
- Can Teachers Predict their Students' Wait Time Preferences?: *Mary A. Altiere and Orpha K. Duell* 455
- Comments and Criticism
- Comments on "The Uses of Lawson's Test of Formal Reasoning in the Israeli Science Education Context: *Gabriel Sunday Bomide* 463

Volume 28, Issue 6, August 1991

- Editorial: *Ron Good* 465
- A Qualitative Study of Middle School Students' Perceptions of Factors Facilitating the Learning of Science: Grounded Theory and Existing Theory: *Barbara S. Spector and Charles W. Gibson* 467

- Testing the Ecological Validity of Teacher-Provided Versus Student-Generated Postquestions in Reading College Science Text: *Joseph A. Pearson* 485
- Enhancing Chemistry Problem-Solving Achievement Using Problem Categorization: *Diane M. Bunce, Dorothy L. Gabel, and John V. Samuel* 505
- Enhancing Learning Using Questions, Adjunct to Science Charts: *William G. Holliday and Garth Benson* 523
- The Effects of Infusing STS Vignettes into the Genetics Unit of Biology on Learner Outcomes in STS and Genetics: A Report of Two Investigations: *Peter A. Rubba, Michael McGuyer, and Thomas M. Wahlund* 537
- Factors in the Development of Proportional Reasoning Strategies by Concrete Operational College Students: *Wolff-Michael Roth and Marlene M. Milkent* 553

Volume 28, Issue 7, September 1991

- Editorial: *Ron Good* 567
- Role of the Epistemic Subject in Piaget's Genetic Epistemology and its Importance for Science Education: *Mansoor Niaz* 569
- Is Piaget's Epistemic Subject Dead?: *Anton E. Lawson* 581
- Teaching/Learning Styles, Performance, and Students' Teaching Evaluation in S/T/E/S-Focused Science Teacher Education: A Quasiquantitative Probe of a Case Study: *Uri Zoller* 593
- Toward a Social-Contexts Frame of Reference for Science Education Research: *Elisabeth Charron* 609
- The Implications of Content Versus Item Validity on Science Tests: *William L. Yarroch* 619
- The Development of Reasoning on the Balance Beam: *Wolff-Michael Roth* 631

Volume 28, Issue 8, October 1991

- Guest Editorial: Improving Science Teaching Through Research: *Joel J. Mintzes* 647
- A Cross-Age Study of Student Understanding of the Concept of Diffusion: *Susan L. Westbrook and Edmund A. Marek* 649
- Novice Use of Qualitative Versus Quantitative Problem Solving in Electrostatics: *Claude McMillan III and Marc Swadener* 661
- Classroom and Community Influences on Youths' Perceptions of Science in a Rural County School System: *Elisabeth H. Charron* 671
- A Study of the Nature of Students' Understandings About the Concept of Burning: *Saouma B. BouJaoude* 689

- The Concept Map as an Advance Organizer: *Marvin Willerman and Richard A. Mac Harg* 705
- A Method to Quantify Major Themes of Scientific Literacy in Science Textbooks: *Eugene L. Chiappetta, David A. Fillman, and Godrej H. Sethna*..... 713

Volume 28, Issue 9, November 1991

Special Issue: Students' Models and Epistemologies

- Editor's Note: *Ron Good* 727
- Overview: Students' Models and Epistemologies of Science: *Marcia C. Linn, Nancy Butler Songer, and Eileen L. Lewis* 729
- Cognition in Scientific and Everyday Domains: Comparison and Learning Implications: *Frederick Reif and Jill H. Larkin* 733
- How Do Students' Views of Science Influence Knowledge Integration?: *Nancy Butler Songer and Marcia C. Linn* 761
- Development of Explanation: Incremental and Fundamental Change in Children's Physics Knowledge: *Kathleen E. Metz* 785
- Understanding Models and Their Use in Science: Conceptions of Middle and High School Students and Experts: *Lorraine Grosslight, Christopher Unger, Eileen Jay, and Carol L. Smith* 799
- The Scientific Theory Profile: A Philosophy of Science Models for Science Teachers: *Cathleen C. Loving* 823
- Epistemological Perspectives on Conceptual Change: Implications for Educational Practice: *Richard A. Duschl and Drew H. Gitomer* 839
- Students' Transition from an Engineering Model to a Science Model of Experimentation: *Leona Schauble, Leopold E. Klopfer, and Kalyani Raghavan* 859

Volume 28, Issue 10, December 1991

- Editorial: Context in Teaching and Learning: *Ronald Good* 883
- Teaching Thermodynamics to Middle School Students: What Are Appropriate Cognitive Demands?: *Marcia C. Linn and Nancy Butler Songer* 885
- A Comparison of Applied and Theoretical Knowledge of Concepts Based on the Particulate Nature of Matter: *Abdullateef H. Haidar and Michael R. Abraham* 919
- A Quantitative Analysis of High School Chemistry Textbooks for Scientific Literacy Themes and Expository Learning Aids: *Eugene L. Chiappetta, Godrej H. Sethna, and David A. Fillman* 939

- Hypothetico-Deductive Reasoning Skill and Concept Acquisition: Testing a Constructivist Hypothesis: *Anton E. Lawson, Christine B. McElrath, Margaret S. Burton, Bart D. James, Roy P. Doyle, Stephen L. Woodward, Lawrence Kellerman, and Jan D. Snyder* 953
- Volume Contents 973
- Author Index 979
